

The Climate Crisis

Recent Science, the Case for Emergency Action and What We Can do About it

Presented by Peter G. Joseph, MD
The Climate Project
Physicians for Social Responsibility

Recent data indicate more rapid warming, stronger feedback effects and accelerating greenhouse gas emissions than previously projected. How can we begin to pull greenhouse gases out of the atmosphere and help to return the Earth to a safe-climate future?

Peter G. Joseph, M.D. is an emergency physician trained by Vice President Al Gore to help educate the public about the devastating impacts of global warming. He will review the latest scientific data and discuss both the technical and political aspects of humanity's greatest challenge.

A special CALISTOGA EARTH DAY presentation.

Everyone is welcome.

Seating is limited, so come early!

THURSDAY, APRIL 23, 2009 at 7:00 P.M.

CALISTOGA COMMUNITY CENTER

1307 Washington Street - across from City Hall
